HOW TO MEASURE FOR YOUR ISOCOVERS ISO-HUB

Selecting the right size ISOCOVER ISO-HUB for your equipment is a lot easier than you might think. All you need is a tape measure, and you are ready to go!

WARNING: When installing or measuring for ISO-HUB, please follow all safety precautions and use proper and adequate protective safety aids such as: protective gloves and suitable protective clothing. Never use a metal tape for measuring purposes. Failure to do so may result in injury.

1. MEASURE FOR EITHER THE (1) CIRCUMFERENCE OR (2) DIAMETER:

CIRCUMFERENCE

OR

DIAMETER

NOTE: It does not matter which method of measurement you decide to use. Just remember that you only need to find your measurement using one of the two ways described above.

2. MEASURE FOR THE DESIRED WIDTH:

WIDTH

NOTE: After finding either the circumference or diameter, measure for the desired width to determine the width measurement of the application you want to insulate.
